Champion

Type

A medium-early hybrid of the Nantes type. Champion is a medium-early hybrid of the Nantes type for the fresh and pre-pack market harvested in autumn, winter and early summer.

Champion is a very uniform, slender and cylindrical carrot up to 24 cm long with a blunt rounded end. The smooth skin is orange as is the internal and external colour. The core is small sized. Champion has a relatively good field standing ability and can be harvested mechanically. Recommended density for fresh market is 150 - 250 plants/m².

Optimum results at maturity when Champion showed blunt rounded ends to the end of harvest.

Features/benefits

- Deep orange-red colour.
- Strong, rather long, foliage - ideal for mechanical harvesting.
- Excellent Alternaria resistance.
- Strong against splitting and breakage.

Earliness	Medium early
Maturity	115 - 125 days (Summer) 125 - 155 days (Winter)
Foliage	Vigorous Rather long Light to medium-green
Root	Depending on plant density and soil type, 16 - 24 cm Slender Cylindrical Deep orange internal and external colour Small-sized core
Disease Resistance	IR: Ad
